Mi-TIC 320™

Powered by the IGNIS engine

The Mi-TIC 320 is part of the argus range of thermal imaging cameras and is the world's smallest NFPA 1801 certified high resolution thermal imager for firefighting applications. The camera provides a crystal clear image with a superb dynamic range; you can clearly view extremely high temperatures up to 1100°C (2000°F) and at the same time see very low temperature objects, which is ideal for casualty searches.

Every Mi-TIC 320 is supplied with a unique dual use desktop/in-truck charger station which securely retains and charges both the thermal imager and a spare battery. Multiple charger stations can be daisy-chained together up to a maximum of 6 units.

PERSONAL

Weighing approximately 755g (1.7lb), the Mi-TIC 320 is a small footprint thermal imager that can be easily and comfortably held in the palm of your hand. Unlike many thermal imagers, the Mi-TIC 320 design allows it to be worn in multiple ways – in the hand, inside a pocket, clipped outside a pocket, clipped to a lanyard or hung around the neck.

SIMPLE

With a thumb operated green "on/off" button and superb start-up time of 5 seconds, the Mi-TIC 320 is simple to use.

SAFE

The Mi-TIC 320 has Class I, Division 2 and Class II, Division 2 Non Incendive certifications. The use of Lithium Iron Phosphate technology ensures the Mi-TIC 320 delivers in excess of 3 hours of battery life over 2,000 plus charge cycles. The Mi-TIC rechargeable batteries are inherently safe due to the use of patented nanophosphate® technology.
